Professional profile

I am a digital designer, focused on interaction design, UX and business consulting. I have two years of experience in consulting and software development, mainly in the context of SharePoint. Being a consultant in a complex field as Intranet has sharpened my customer and business perspective. My development experience is mainly JavaScript (AngularJS), typescript, HTML and CSS/LESS. Holding a Master's degree in Digital Design with specialization in Audio Design I feel at home in audio-visual communication and I am passionate about interaction design and user experience design. The complexity of Audio Design has taught me the ability to read the users needs between the lines and be a proactive sparring partner.

Working with me

I am a team player with great cooperation skills and experience in SCRUM. I am hard working and I am always thirsty to learn new stuff. I love challenges and thrive in situations where I have to perform over my level. In teamwork I contribute with a positive, dedicated mindset and great analytical skills. I like to challenge ideas and mindsets, but respect decisions of others. I am flexible and good at aligning to the needs of the team and I know the importance of a deadline. The drive behind me is a tremendous self-motivation and high ambitions. When I am working solo, I can also deliver great results, as I have a structured approach to my tasks and experience as a consultant.

Work experience

2014 – now: Developer and Business Consultant at ProActive. Areas of responsibility:

- Designing the visual identity of IntraActive (SharePoint Intranet product), incl. hosting workshops, designing and implementing design.
- Active in adjusting the design process to align it to customers and business needs.
- Delivering IntraActive from idea to launch in production incl. workshops, installing, configuring, designing and teaching.

Achievements:

- won the 'Employee of the month' -prize twice.
- designing intranet portals for 8 customers, and working with 15 designs, plus the overall design process and strategy.
- wireframing a very complex system for collecting, handling and reporting electricity data.

2013 – 2014: SharePoint Developer at Danske Commodities. Areas of responsibility:

- Research new relevant features and functionality on SharePoint based Intranet
- Prioritize all incoming feature requests in regards to the overall company values

- Challenge and creatively improve feature requests for SharePoint solutions
- Ensure agile and efficient development with short delivery cycles and high quality out put
- Ensure close, relevant and timely communication with stakeholders
- Educate colleagues to ensure correct use of and general knowledge about SharePoint
- Improve and challenge visions and strategy regarding the use of SharePoint in the organization

Achievements:

- Experience in .Net / C#, JavaScript, JQuery, HTML, CSS, and OOB SharePoint functionality.

2012: Implemented the audio Installation *Ekkomaten* with Morten Breinbjerg. The installation was part of the *1700-century festival* that took place in Aarhus in March 2012.

Achievements:

- ability to convert a complex idea of a specific user experience into an actual interactive sound implementation
- implementation in Unity3D

2011: Founded *Rabe Sound Design*, a company in which I was producing sound and music, working as a consultant and providing workshops, lectures (at master class level) as well as creating design strategies for design and implementation of sound and music to digital multimedia.

Achievements:

- analysing and supervising demands, possibilities, needs and general nature of a given job through clear communication
- negotiating price, timespan and general working conditions with customers
- planning and executing a project within deadlines, financial framings and project definitions
- skills and experience with the administrative tasks of a company

2011 + 2007: Employed as an Assistant Teacher of Organizational Analysis, Aarhus University. See letter of recommendation (2007) or contact Jonas Kroustrup (+45 40123043) for reference (2011).

Achievements:

- extensive knowledge of organisations, workflow processes and IT systems impact on a work culture and work force as well as peoples interaction with an organization
- strong insight in typical occurring challenges when changing an organizations workflow, goals or IT systems etc.
- ability to plan and deliver lessons of a high academic standard on a given topic
- adjust and vary the content and the level of a planned lesson in accordance with the actual level of present students in order to achieve maximum outcome for most students

2010: Intern at *Center for Digital Urban Living* (DUL), developing the interactive musical instrument 'DjStation' in collaboration with *Centre for Advanced Visualisation and Interaction* (CAVI) as a part of the interactive exhibition '*Digital Natives*' at *Aarhus Kunstmuseum*

Achievements:

- strong project management skills, especially when dealing with tight deadlines, and fulfilling financial and conceptual demands
- working and using mock ups as a tool of development in interaction design
- including user tests and feedback as a natural iteration of the development process
- ability to conceptualize, design, plan, implement and debug a product and achieving the best possible result within deadlines, financial limits and demands given by the overall concept
- strong collaboration and communication skills when working with an extremely diverse group of professionals, empowering the project with each their respective focus, knowledge and competences
- ability to focus on both the specific challenges as well as the overall aspects
- working on specific tasks while keeping the overall concept in mind
- watch a presentation at rasmusbendtsen.com

2008 – 2009: Employed as a Technical Supporter at *SellByTel* in the Epson Project in Barcelona. Giving presales and support for printers, projectors, scanners, copy machines and faxes.

For reference please contact Patricia Avila, Phone: +34 695 392 136.

Achievements:

- strong communication skills needed for explaining advanced technical IT problems and solutions to colleagues and customers with extremely varying range of IT skills
- ability to quickly understand the core issue of a complex technical problem, and search and communicate the solution to the customer or execute it directly
- working in an international environment, as well as communicating with costumers and colleagues across cultural borders
- I developed a document supporting the structure and ensuring workflow of employees in *SellByTel*. This document has since been translated into various languages and is still used among employees for different countries

Education

2009 – 2012: Master of Science in Digital Design (cand.it), with specialisation in audio design. Master thesis title: *Sound for Electric Vehicle Traffic: Functional and Aesthetic considerations – A Design Proposal for the Future Sound of Traffic.*

Achieved skills:

- programming in C#
- analytical skills aimed at research, innovation and development
- designing with user-profile and work flow patterns in mind, to ensure maximum user experience, user-friendliness and convenient user-skill/software-complexity balance
- planning, executing and controlling a design and development process
- project management and team cooperation
- analytical and theoretical understanding of acoustics and sound
- understanding the importance of the cultural context for a design/product
- designing, producing and implementing interactive sound for digital media, games and products

2010: Lead Audio Designer on the Unity game *Sophies Dream Leap* as a student at DADIU (dadiu.dk)

Achieved skills:

- strong sound implementation skills in Unity3D (C#)
- interactive music composition and implementation
- cooperation with programmers, leads, directors and general team work
- ability to quickly sketch a musical style, or suggestions for an auditive expression
- setting ambitious goals, and meeting them within the deadline

2005 – 2008: Undergraduate degree (bachelor) in Information Studies with a supplementary subject in "Musical culture" at Musicology from Aarhus University.

Achieved skills:

- general system development knowledge and programming skills
- mediation between programmers and end-users to ensure optimal complexity/ usability balance
- planning, implementation and optimizing working processes

2000 – 2003: Risskov Amtsgymnasium with A-levels in Math and Music.

Other

- 2012: lived in Luxembourg while on 6 months parental leave with my son.
- 2008 – 2009: lived and worked in Barcelona.
- 2006 - 2008: joined the orchestra "Stilwerk" (www.stilwerk.nu) with Abletons Live 6 as my instrument.
- 2005: traveled 3 months through Russia, Mongolia, China, Vietnam and Thailand.
- 2004: composing, recording and producing music for a short movie from LoneTower Visuals.
- 2003: released the piano EP "Generating" with own compositions.
- 2003: project evaluation travel to Mexico with "Operation Dagsværk" (www.od.dk).

Courses

- 2007: drivers licence, class B.
- 2004: 3 months' course at "Brandbjerg Folk High School" (www.brandbjerg.dk)

Personal life

Composing, producing and performing music has a central role in my life. When kids, friends and family takes my time. I am married to a Czech and have two kids (Magda, 1 year, and Tadeas, 4 years). I have a strong international profile. We have lived both in Barcelona and Luxembourg, and I am confident that this international experience has made me more sensitive to cultural differences and therefore I am capable of working in an international environment with great ease. When I am not busy with my music, my free time goes mostly with family and friends.
